

Fire detection and evacuation solutions that save lives.

Deckhead Mounting Box and Accessories

Features

- Protects against water ingress
- Improved performance
- Available in polycarbonate or metal
- Polycarbonate Deckhead Mounting
- Mounting Box also fits Audio Visual bases when used with the Accessory Kit

Description

The Deckhead Mounting Box is a device which protects bases, sounder bases and sounder beacon bases from the ingress of water or other liquids. It is screwed to the soffit and accepts a variety of bases.

The Deckhead Mounting Box is used on its own in most cases but there are applications where either an extension sleeve or an adaptor ring is required.

The unit is secured to the mounting surface through two 5.4mm holes and has 6 cable access ports for M20 glands.

The Accessory Kit incorporates the Extension Sleeve and Adaptor, the Extension Sleeve is required when fitting heater or deep bases; the Adaptor Ring is needed for fitting sounder bases, beacon bases or sound beacon bases.

The Metal Deckhead Mounting Box is a robust metal unit which can be used with Series 65, XP95 and Discovery bases to protect against ingress of water or other contaminants through the rear of the base.

The Metal unit is secured to the mounting surface through two 5mm holes in the web. There are three cable ports, spaced at 90° intervals which are threaded accept M20.

Deckhead Mounting Boxes are compatible with the following standard bases:

Australian Item No	International Part No
201-0029	45681-200AMP
	45681-201
201-0540	ORB-MB-00001-AMP
