

Fire detection and evacuation solutions that save lives.

Willco Detector Bracket Kit

Features

- Adjustable mounting heights
- 3 x Height adjustment brackets included
- Manufactured from Galvanised Steel

Description

The Willco Detector Bracket has been designed to allow installation of fire detectors within a concealed ceiling space at variable heights. The bracket assembly enables easy inspection and maintenance of the fire detector from below ceiling level.

Installation is quick and easy using the existing designated false ceiling hanger along with readily available 20mm electrical conduit (not supplied).

Note: detector & base not include in kit.
