

Fire detection and evacuation solutions that save lives.

ACP-05 Manual Call Point IP65

Features

- Key Resettable
- No frangible glass to replace after operation
- Quick reset without disassembly
- Foolproof testing by actual operation
- Double action operation
- Compact design
- Wire protected connectors
- Standard conduit size cable entry
- Cost effective installation and maintenance
- Weatherproof to IP65

Description

The Ampac ACP-05 double action resettable Manual Call Point (MCP) has been designed to make installation and testing quick, easy and cost effective. The ACP-05 is compatible with the full range of conventional and addressable fire control panels manufactured by Ampac.

The Ampac ACP-05 incorporates a protective cover to help stop malicious or accidental false alarms which is ideal for public buildings such as hospitals, hotels, schools and colleges.

The combined test, reset and lid release mechanism means only one tool is required for maintenance and reset purposes. The resettable element includes an alarm flag providing quick, visible alarm identification when activated.

Application

- Schools
- Colleges
- Hospitals
- Nursing Homes
- Hotels
- Public Buildings
- General office areas

Specifications

Supply Voltage	27V DC
