

## Case Study

# Dive Support Vessel

Ampac's FireFinder Marine protects a 90-meter Dive Support Vessel sailing in the Arabian Gulf.

Working with the 3 Lions Group, Ampac provided a replacement fire alarm system for Dive Support Vessel RAWABI 501 in the Arabian Gulf.

**Location:** Bahrain & The Arabian Gulf

**Sector:** Marine

**Products:** FireFinder Marine

**Completed:** 2021

### The Challenge

- Marine Application

### The Solution

The system included a 4 Loop FireFinder Marine Addressable Fire Alarm Control Panel, Discovery Marine Smoke and Heat Detectors, Manual Call Points, Deckhead Mounting Boxes, and Isolators.

In addition, new Intrinsically Safe Smoke Detectors and Manual Call Points were added to the system. As well as a High Level Interface Card for the MODBUS output and interface to the vessel VDR system.

Once the product had been delivered to the site, Ampac provided dedicated product training via video call and followed up with several communications to ensure seamless installation and commissioning of the system.
