

Fire detection and evacuation solutions that save lives.

Q25WZ Capability Statement

Established in 1974, Ampac delivers fire detection and evacuation systems that save lives. We specialise in the design, manufacturing, and distribution of world-leading fire detection and evacuation systems for commercial, industrial and multi-residential complexes. Ampac remains the largest local manufacturer in Australia, servicing clients all over the world.

Here at Ampac, we believe there is no greater responsibility than the protection of human life. Our purpose is to prevent loss of life and catastrophic damage caused by fire. Always.

We're on a mission to provide the most effective fire detection and evacuation solutions in the industry. We want our customers to feel confident knowing they are partnered with an industry expert providing them with a system that will save lives and minimise the damage caused by a fire.

The above statements encompass the philosophy and strategy by which Ampac exists and will continue to grow.

Our Values

- We have trust and respect for individuals.
- We focus on a high level of achievement and contribution.
- We conduct our business with uncompromising integrity.
- We achieve our common objectives through teamwork.
- We encourage flexibility and innovation.

Ampac's Certifications

In order to sell fire detection and emergency warning products in a selected country, the products must comply to the appropriate product and install standards of the selected country. For this reason, Ampac's fire detection and emergency warning products are certified to meet the product and install standards of the target country. The certification process involves submitting products for functional and environmental testing to third party testing organisations, and regular audits.

Ampac's Certifications for Fire Detection and Emergency Warning Products Include:

- Australia AS 4428, AS 7240 and AS 2220.1
- New Zealand NZS 4512
- Europe / SE Asia EN54
- Malaysia MS1745
- Singapore CP10
- Chinese GB4717, GB16806, GB17429
- Marine DNV, LR, CCS

Major Installations Include:

- Hospitals
- Hotels
- High Rise Office Towers
- Universities
- Banks
- Shopping Centre's
- Airports

Ampac are committed to a Quality Management System in accordance with ISO9001:2015 in the design, manufacture and supply of emergency warning and fire detection products. The management of Ampac is firmly committed to supporting its people, to ensure they have the necessary education, training, information and tools to help implement the processes as described in our Company Quality Manual and Policies.
